

## Module 1 Assignment Problem Statement

Complete the 'My Profile' app screens. We learnt how to build the 'My Profile' screen and the 'My Profile Photo' screen. Now try making the 'Education' and 'Work Experience' screens yourself. Once you have made the remaining screens, make a .zip or .rar file of your Android project and upload it in the progress tracker section. You can download the solution project files once you upload your solution. The details of all the screens are given below. You can choose to use your photo and details in the screens. Have fun! :)

Note: In the 'Education' and 'Work Experience' screens, you would find a grey line separating the details. Try to find a way to make those lines by researching over the internet.

### **'My profile' screen**

This would be the home screen of the app, meaning when app is launched, user will land on this screen. The screen will have the basic info of a person. It will display his square picture, his name, his email ID, his phone number, an 'Education' button and a 'Work experience' button.

### **Resources:**

Header BG color: #CC1111

Square Tony Stark photo: [tony\\_stark\\_small](#)

Profile photo size: 66dp x 66dp

Name text size: 24sp

Name text color: #222222

Email text size: 14sp

Email text color: #555555

Phone no. text size: 14sp

Phone no. text color: #555555

Button BG color: #CC1111

### **My Profile Photo screen**

This screen would display the name of the person in the header and the picture of the person in full size below the header.

### **Resources:**

Header BG color: #CC1111

Full size Tony Stark photo: [tony\\_stark\\_large](#)

## 'Education' screen

This screen would display the education details of the person.

### Resources:

Header BG color: #CC1111

Degree text size: 16sp

Degree text color: #222222

College text size: 12sp

College text color: #555555

Divider color: #CCCCCC

### **'Work experience' screen**

This screen would display the work experience details of the person.

#### **Resources:**

Header BG color: #CC1111

Degree text size: 16sp

Degree text color: #222222

College text size: 12sp

College text color: #555555

Divider color: #CCCCCC

**Note:** You do not have to connect the screens for now. Just design the layouts in the XML layout files and upload the project.
